PEDRO D. C.

Full-Stack Developer - AI Automations

📞 +351 910669714 | @ caaddp@gmail.com | 🔗 linkedin.com/in/pedro-ddaa-costa
📍 Remote (Portugal)

EXPERIENCE

AI Automations - WhatsApp Chatbot Developer
AI Automations
📅 09/2025 | 📍 Remote

- Developed a WhatsApp automation chatbot integrating OpenAI and Google Gemini APIs for conversational responses and Google Cloud APIs (Sheets + Drive) for dynamic data managment
- Automated user query handling, document lookup, and task scheduling, reducing manual support interactions by ~75%
- Deployed via n8n with webhook triggers and fallback logic to ensure 99% uptime
- Stack: Node.js, n8n, Zapier, OpenAI API, Google Gemini API, Google Cloud APIs (Sheets, Drive)

AR App Developer
Vision4You
📅 01/2025 - 06/2025 | 📍 Aveiro, PT

- Spearheaded the design and development of an AR real-estate application enabling users to virtually explore and navigate properties through full 3D walkthroughs
- Implemented image tracking, waypoint-based movement, and interactive 3D model loading using Unity (C#), Python, and JSON
- Documented technical pipelines for future scalability, including modular scene loading and integration with Lightship SDK for AR geospatial features
- Stack: Unity, C#, Python, JSON, URP, AR Foundation, Lightship SDK, Blender

Full-Stack Scouting Platform - Mobile + API
Académico de Viseu FC
📅 10/2024 - 02/2025 | 📍 Coimbra, PT

- Led a 6-person team to deliver the scouting platform and App, while also designing REST APIs, data models, and CI/CD; improved data integrity ~40%
- Drove GitHub Flow reviews and testing culture (Jest unit tests)
- Stack: Flutter, Node.js, Express, MongoDB, Firebase, GitHub Actions

EDUCATION

BSc, Technology & Multimedia Design
Politécnico de Viseu
📅 09/2022 - 07/2025 | 📍 Viseu, PT

- Relevant: OOP, Data Structures, Web Dev, Software Eng., Game Design

MSc, Architecture - FAUL
University of Lisbon
📅 09/2017 - 08/2022 | 📍 Lisboa, PT

SUMMARY

Full-Stack Developer Junior Full-Stack Developer with hands-on experience across React, TypeScript, Node.js, MongoDB, PostgreSQL, Python, and CI/CD. Delivered production features, APIs, and mobile solutions that cut manual work 67%, improved data integrity, and accelerated release cycles. Comfortable with REST/GraphQL, authentication, testing (Jest/Playwright), and cloud deployments (Docker, Firebase, Vercel/Render). Remote-ready and team-oriented.
